GEORGIA CHAMBER

REGION 9

For over a century, the Georgia Chamber has helped businesses and communities mitigate risk, take advantage of opportunities, and better understand the changes impacting our state.

Today, Georgia's society and economy are rapidly changing and the pandemic, coupled with the recession, has changed how we address innovation, what we consider community, how we work, and ultimately how we approach life.

From free enterprise, diversity, and talent to healthcare, infrastructure, innovation, and rural Georgia, we want your feedback about what comes next and how we plan for the future.
